

THORNBURG NEW MEXICO INTERMEDIATE MUNICIPAL FUND

Fact Sheet | 31 March 2022

INVESTMENT OBJECTIVE

The fund's goal is to provide investors with as high a level of current income exempt from federal and New Mexico state individual income taxes as is consistent with preservation of capital. The fund also seeks to reduce share price volatility compared to longer-term bond portfolios.

INVESTMENT APPROACH

The fund is an actively managed diversified portfolio of municipal bonds issued by the state of New Mexico. The investment team aims to match municipal market structure and deal flow through a relative value framework that operates across geography, sectors, issuers and revenue streams. Operating as generalists, team members participate in all key aspects of investment management: credit research, trading, portfolio construction and risk oversight.

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate so shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than quoted. For performance current to the most recent month end, visit thornburg.com or call 877-215-1330. The maximum sales charge for the Fund's A shares is 2.00%. There is no up-front sales charge for the I shares. There is no up-front sales charge for the I shares. The total annual fund operating expenses are as follows: A shares, 0.98%, I shares, 0.71%. Thornburg Investment Management and/or Thornburg Securities Corporation have contractually agreed to waive fees and reimburse expenses through at least February 1, 2023, for some of the share classes, resulting in net expense ratios of the following: A Shares, 0.98%; I Shares, 0.67%. For more detailed information on fund expenses and waivers/reimbursements, please see the fund's prospectus. Without these waivers, SEC yields would have been as follows: A Shares, 0.95%; I Shares, 1.26%.

GROWTH OF \$10,000

The Hypothetical Growth of \$10,000 graph reflects reinvestment of dividends and capital gains. If any, as well as all fees and expenses.

CREDIT QUALITY RATINGS (%)

(percent of fixed income)

A bond credit rating assesses the financial ability of a debt issuer to make timely payments of principal and interest. Ratings of AAA (the highest), AA, A, and BBB are investment-grade quality. Ratings of BB, B, CCC, CC, C and D (the lowest) are considered below investment grade, speculative grade, or junk bonds. Credit quality ratings use the highest rating available from either S&P Global Ratings or Moody's Investors Service. Where neither rating is available, we have used ratings from other nationally recognized statistical rating organizations (NRSROs). May not add up to 100% due to rounding.

Please visit thornburg.com for latest portfolio manager commentary.

Important Information

Investments carry risks, including possible loss of principal. Portfolios investing in bonds have the same interest rate, inflation, and credit risks that are associated with the underlying bonds. The value of bonds will fluctuate relative to changes in interest rates, decreasing when interest rates rise. Unlike bonds, bond funds have ongoing fees and expenses. Investments in the Fund are not FDIC insured, nor are they bank deposits or guaranteed by a bank or any entity.

Class I shares may not be available to all investors. Minimum investments for the I share class may be higher than those for other classes.

Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment losses.

The ICE BofA 3–15 Year U.S. Municipal Securities Index is a subset of the ICE BofA U.S. Municipal Securities Index including all securities with a remaining term to final maturity greater than or equal to three years and less than 15 years.

The laddering strategy does not assure or guarantee better performance than a non-laddered portfolio and cannot eliminate the risk of investment losses.

Indices do not take into account fees and expenses. Investors cannot make direct investments in an index.

To determine a fund's Morningstar Rating™, funds and other managed products with at least a three-year history are ranked in their categories by their Morningstar Risk-Adjusted Return scores. The top 10% receive 5 stars; the next 22.5%, 4 stars; the middle 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10% receive 1 star. The Risk-Adjusted Return accounts for variation in a managed product's monthly excess performance (excluding sales charges), placing more emphasis on downward variations and rewarding consistent performance. Other share classes may have different performance characteristics. © 2022 Morningstar, Inc. All Rights Reserved. Alternative Minimum Tax (AMT) - A federal tax aimed at ensuring that high-income individuals, estates, trusts, and corporations pay a minimal level income tax. For individuals, the AMT is calculated by adding tax preference items to regular taxable income.

Effective Duration - A bond's sensitivity to interest rates, incorporating the embedded option features, such as call provisions. Bonds with longer durations experience greater price volatility than bonds with shorter durations.

Average Effective Maturity - Weighted average of the effective maturities of the bonds in a portfolio. Effective maturity incorporates the embedded option features of the bond, such as prepayments, call and put options.

Average price is the mean price of an asset or security observed over some period of time. It is calculated by finding the simple arithmetic average of closing prices over a specified time period.
